Bioformix, Inc. Introduces Nexabond™ 2500 Instant Wood Adhesive at International Woodworking Fair

Cincinnati (August 2012) – Bioformix, Inc., a manufacturer of energy efficient, high-performance, sustainable polymer platforms, introduced its Nexabond 2500 Instant Wood Adhesive at the International Woodworking Fair (IWF) in Atlanta. Nexabond 2500 Instant Wood Adhesive, a super durable, instant wood adhesive, enables woodworking and other industry professionals to speed up production and reduce energy consumption in their assembly processes.

“The Nexabond 2500 product line offers end-users high impact resistance, high peel strength, rapid cure speed, rapid tensile strength, is solvent-free and requires no mixing of components. We are excited to see how it will influence the woodworking industry,” commented Adam Malofsky, founder, president and CEO of Bioformix, Inc.

The company chose to debut Nexabond 2500 at the IWF because it is the largest woodworking trade show for furniture manufacturing, cabinetry, custom woodworking and related industries. The event took place at the Georgia World Congress Center during August 22-25, 2012.

About Bioformix, Inc.

Founded in 2009 by president and CEO Adam Malofsky and his father, Bernard Malofsky, PHD, Bioformix, Inc. was formed to commercialize energy efficient, high-performance, sustainable monomers, resins and polymers. Venture capital backed by over \$500 billion in revenue companies, Bioformix will transform energy consumption in polymer based manufacturing, decorating and assembly. The company is currently best known for its revolutionary Nexabond™ 2500 Instant Wood Adhesive, a quick curing, water-free, super durable, instant wood adhesive that allows for a 75% reduction in cabinet assembly times.
